Handout 5A

Action Planning Sheet Example

ENVIRONMENTAL ISSUE / PROBLEM:

Water Shortage in Town

POLICY OR PRACTICE TO BE CHANGED:

People in the community are wasting water (community practice).

PROJECT GOAL: (We want ____ to ____, which will result in ____.)

We want community members to use water wisely, which will result in less water shortages in town.

STRATEGY: (In order to achieve this, we will ____.)

In order to achieve this, we will educate the community and work on a local ordinance limiting water use.

KEY PARTS OF THE STRATEGY: List the main categories of tasks.

- 1
Plan and coordinate a water awareness forum at the school.
- 2
Publicize the water awareness forum and Earth Force activities.
- 3
Develop a leaflet describing water use and water shortages.
- 4
Promote a local ordinance that would limit nonessential water use.
- 5
Distribute information to the community: go door-to-door with information about how to conserve water, and mail leaflets to businesses and parents.
- 6
Find out what people already know by conducting surveys and interviews.
- 7
Research best practices on wise water usage.
